Code

header

```
enum etask {  
    TASK_NOTHING,  
    TASK_SEARCH  
} extern task;
```

int main()

```
int main() {  
  
    com_init();  
  
    while(1) {  
  
        if (task == TASK_NOTHING) {  
            com();  
        } else {  
            root();  
            task = TASK_NOTHING;  
        }  
  
    }  
  
    return 0;  
}
```

}
