Chess Art For Kids Logo

Chess Art For Kids, a free [Android](#) chess program written in [Java](#), which has its own [GUI](#) and incorporates the [Bagatur](#) chess engine by [Krasimir Topchiyski](#). The latest version could be downloaded from [Google Play](#) and runs under phones and tablets ^[1]. Chess Art For Kids supports different playing modes like standard chess, free style, pieces aware ^[2], as well as different skill levels, which makes the program suitable for learning chess. It also offers other features like different color palettes and different piece sets.
