

[Home](#) * [Engines](#) * [ChessBin.com](#)

ChessBin.com is a [C#](#) chess engine by [Adam Berent](#) that is designed to teach chess programming. [ChessBin.com](#) chess engine is very well documented in a blog format, explaining each source block of the chess engine, identifying it's purpose. Although educational in nature, the engine is used in several software implementations; the most notable as the computer opponent in the [online chess](#) system hosted on [GeeksWithChess.com](#) as well as [LiveChess.info](#)

ChessBin.com chess

Part of the [ChessBin.com](#) project you will also find a free [Chess Game Development Kit](#) ^[1] that will give users a head start in creating their own chess engine.
