The Garden of Eden ^[3]

Eden,

a [Chess Engine Communication Protocol](#) and [UCI](#) compliant chess engine by [Nicolai Czempin](#), written in [Java](#). A compiled version is available from [Jim Ablett's](#) Winboard Chess Projects site. Eden is a tribute to [Wilkins' Paradise](#) ^[1], but apparently does not incorporate Paradise' search paradigms.

Eden represents the board as one-dimensional [10x8 array](#), and applies a straight forward [alpha-beta](#) with [iterative deepening](#) and [quiescence search](#), utilizing three [Zobrist](#) based [Hash tables](#), for [transpositions](#), [pawn structure](#), and [opening book](#) ^[2].
