Neurologic,

a chess program by [Jochen Peussner](#), which played the [WCCC 1999](#), various [International Paderborn Computer Chess Championship](#) from [1997](#) until [2005](#), and the [BELCT 2001](#).

Unlike its name suggests, it is a conventional [alpha-beta](#) searcher without any [neural networks](#) involved ^[1], but has an sophisticated [evaluation](#) with a lot of [chess knowledge](#) implemented with rather speculative terms.
