## SciSys X,

an experimental, not yet commercially available [dedicated chess computer](#) produced by [SciSys Ltd.](#), which competed in the open group of the [WMCCC 1981](#) in [Travemünde](#), [West Germany](#). While the [ICGA](#) tournament page mentions [Kevin O'Connell](#) as author of SciSys X <sup>[1]</sup>, it was likely another [Philidor Software](#) program by [Mark Taylor](#) and/or [David Broughton](#).
